

# GA Aquarium Think Tic Toe

Directions: As you explore the Ocean Voyager exhibit use the following to summarize your learning. Write your answers in Think Tac Toe board for each question. See if you can get a tic tac toe by completing three in a row. For a real challenge, try to cover the whole board.

What ocean is the tarpon found in?	List three animals that are found in the Pacific Ocean.	How long is a sand tiger at birth?
What is one animal that can be found in the Indian Ocean?	What ocean is the pork fish found in?	What does the bat fish eat?
What is the lifespan of a humphead wrasse?	Can you find an ocean animal that is found worldwide?	List three plants found in any ocean.

\*Bonus: What is the largest fish in the ocean? (Hint: It has a four foot wide mouth and eats the smallest animals in the ocean.)

- After your Think Tac Toe board is completed. Please explore the Cold Water Quest exhibit to complete your Scavenger Hunt.

## Answer Key

What ocean is the tarpon found in?  <b>Atlantic Ocean</b>	List three animals that are found in the Pacific Ocean.  <b>Western Atlantic Ocean</b>	How long is a sand tiger at birth?  <b>1 meter long</b>

# Cold Water Quest Scavenger Hunt

Directions: Go on a scavenger hunt through the Cold Water Quest exhibit. Write your answers below.

<p>Name the endangered bird that lives off the coast of Africa and rarely sees snow or ice.</p>	<p>Hint: There are only about 120,000 of these “fancy dressed” birds left on the continent of Africa.</p>
<p>Name the animal that is found in the arctic and sub-arctic regions of the world that can dive as deep as 3,000 feet and hold its breath for 20- 25 minutes.</p>	<p>Hint: This “White skinned mammal” has a flexible neck and has the ability to swim backwards.</p>
<p>Name the eight-legged sea animal that can be found off of the coast of the North Pacific Ocean from Southern California to Japan.</p>	<p>Hint: This “giant” of the sea can have as many as 1,800 suckers on its arms, has three hearts, and blue blood.</p>

Name the plant-like looking animal can be found in the southeastern Indian Ocean along parts of the coast of southern Australia.

**Hint:** This beautifully camouflaged creature lives close to reefs where there is kelp other algae and its' plant like appearance helps it to blend in with its surroundings.

Name the largest sea star that can be found in the Pacific coast from Alaska to Southern California that can grow to be 39 inches in diameter and up to 11 pounds.

**Hint:** This "flowery" sea animal may begin live with only five arms but can eventually have up to 24 arms as an adult which helps it to move up to 10 feet per minute.
